## DISCLAIMER

La información correspondiente al reporte es obtenida del reporte de Valor Cuota disponible en el portal de la Superintendencia del Mercado de Valores (SMV) para el periodo correspondiente, con fecha de corte 02/10/2026.

El reporte ha sido elaborado por la AAF de forma descriptiva, sin que sea precisamente una recomendación de compra o venta de cuotas de participación de Fondos Mutuos.

Además, AAF informa que la rentabilidad o ganancia obtenida en el pasado, no garantiza que se repita en el futuro y dicha rentabilidad no incluye el efecto de las comisiones de suscripción y rescate, ni el impuesto a la renta.

La categoría de los fondos mutuos flexibles incluye fondos mutuos que invierten principalmente (no totalmente) en deuda. Por último, la AAF no asume responsabilidad por el mal uso de la información proporcionada o por su uso contra las indicaciones antes expuestas.

# EDUCACIÓN AL INVERSIONISTA

## ¿QUÉ DEBERÍA TENER EN CUENTA PARA INVERTIR EN FONDOS MUTUOS?

Cuando contamos con excedentes de dinero, nos preguntamos ¿dónde puedo invertir? o ¿puedo ahorrar para alcanzar una meta futura?

Al realizar el análisis de las diferentes opciones de ahorro e inversión, se deberá pensar principalmente en la rentabilidad (cuanto voy a ganar), la liquidez (cuando puedo disponer de mi dinero) y el riesgo de la inversión. Para este efecto, el inversionista debe preguntarse: ¿cuánto tiempo estoy dispuesto invertir? (es decir a sacrificar la disponibilidad de dinero), por lo que la rentabilidad que espera debe reflejar una tasa de interés que muestre el costo de oportunidad de sacrificar su liquidez y disponibilidad de recursos. Adicionalmente, el inversionista debe establecer su perfil de riesgo, esto es, qué tan arriesgado quiere ser con su inversión buscando una rentabilidad, pues como lo establece la teoría “a mayor riesgo, mayor rentabilidad”.

Una excelente opción para lograr su propósito, son los FONDOS MUTUOS, inversión que le permite ingresar al mercado de valores con sumas de dinero que no son significativas. Estos productos son ofrecidos por las Sociedades Administradoras de Fondos Mutuos reguladas por la Superintendencia del Mercado de Valores (SMV), a través de sus agentes colocadores (Bancos, Financieras, Sociedades Agentes de Bolsa entre otros) y son vehículos de administración de recursos de un número plural de personas, gestionados por un equipo profesional para obtener resultados económicos colectivos.

En el mercado se encuentran diferentes opciones de Fondos Mutuos para cada perfil de riesgo. Están los fondos mutuos de Deuda, para personas conservadoras, que pueden invertir sólo en instrumentos representativos de deuda tales como certificados de depósitos y bonos, que brindan una rentabilidad predecible en vencimientos de 90 días, y de uno, tres y más años. También se pueden encontrar los fondos mutuos de Renta Variable, para perfiles agresivos, que pueden invertir en acciones de empresas o cuotas de participación de otros Fondos. Y también están los fondos mutuos mixtos que invierten en instrumentos de deuda y de renta variable, para inversionistas con un perfil moderado. Es así que existe una amplia gama de fondos mutuos en los cuales se puede invertir de acuerdo al horizonte de tiempo que se mantenga la inversión y el tipo de riesgo que se desea asumir.

Es importante tener en cuenta, que los Fondos Mutuos cuentan con una nueva reglamentación que se ha desarrollado en concordancia con el mercado desde el año 2010; generando de esta manera una mayor confianza en los inversionistas de contar con una inversión administrada, regulada y asesorada, y bajo la supervisión de la SMV.

Para un mejor entendimiento del Fondo Mutuo en el que desea invertir, existe el Reglamento de Participación, el Prospecto Simplificado del respectivo Fondo, y los estados de cuenta que la Sociedad Administradora remite mensualmente a cada partícipe.
